

SUKESH SURASE

IT / Software Professional

Sungai Choh, Rawang, Selangor, Malaysia | +60 10-285 3920 | surasesukesh@gmail.com | [linkedin.com/in/sukesh-surase](https://www.linkedin.com/in/sukesh-surase) | sukeshprofile.vercel.app | github.com/Keshz28

PROFESSIONAL SUMMARY

Final-year Bachelor of Information Technology (Hons.) student and full-stack developer with hands-on experience across web, mobile, and XR/AR/VR development, UI/UX design, and document/process automation. Proven track record delivering production websites, internal dashboards, and client-facing tools for construction and hospitality businesses, alongside strong project management, public speaking, and event coordination experience. Oracle Database SQL Certified Associate. Seeking to apply a broad technical skill set and self-directed build style to an IT/software role.

TECHNICAL SKILLS

- Languages: JavaScript / TypeScript, HTML5, CSS, Python, Java, C#, PHP, Dart
- Frameworks & Platforms: React, Next.js, Angular.js, Node.js, Tailwind CSS, Flutter, Unity (XR/AR/VR), WordPress
- Databases: Oracle SQL, MySQL, PostgreSQL, MongoDB, Firebase
- Design & Prototyping: Figma, Canva, UI/UX Design
- Other: Project Management, Event Management, Public Speaking, Document Automation

CERTIFICATIONS

- Oracle Database SQL Certified Associate — Oracle

EXPERIENCE

Web Development Intern — BLUEDALE Group of Companies (BGOc) 2026 – Present

- Led the front-end redevelopment of the KLTG corporate website (new.kltheguide.com.my), applying modern web development and UI/UX practices
- Built an internal admin dashboard and Clients Gallery module for the Bluedale company site
- Converted structured QA test plans into version-tracked Word documents by scripting the docx format (Node.js), streamlining tester tracking for the QA process
- Digitized internship logbook records into structured Word documents via automated XML manipulation (Python)
- Prepared and presented an internship report summarizing project deliverables to internship supervisors

Operation Manager — Sinar Jasa Trading Dec 2025 – Present

- Developed and deployed the company website, applying front-end development and web design best practices
- Managed website content, updates, and performance to support ongoing business operations and client engagement
- Oversaw on-site operations, supervising work progress, monitoring compliance, and coordinating with workers and vendors
- Produced and edited PDF quotations and Bills of Quantities (BOQ) for renovation projects

Chief Executive Manager of IT (Coordination) — SJ Sunrise Services 2023 – 2025

- Managed IT project planning and execution, ensuring alignment with organizational objectives
- Optimized system operations by implementing efficient processes and technology solutions
- Independently supervised renovation projects, coordinating timelines and deliverables
- Handled quotations and invoicing, streamlining financial documentation for the company

Student Council Representative & Event Host — HELP University 2023 – Present

- Hosted HELP University's August 2024, January 2025, and May 2025 student intake ceremonies, representing all departments
- Hosted Deepavali Night, engaging HELP staff and students through public speaking and event coordination
- Led a stray animal adoption and neutering awareness event, achieving significant audience engagement
- Served as Pillar of "Talent Pool" (one of 9 pillars) within the Information Technology Student Council (ITSC)
- Managed IT student participation in inter-department sports events and organized an internal e-sport tournament for HELP students

SELECTED PROJECTS

- VR Campus Tour (Final Year Project) — Immersive virtual reality campus tour built in Unity; in progress with a project teammate
- KL TG Website — Led the front-end redevelopment of the KL The Guide corporate website on its new subdomain, new.kltheguide.com.my, applying modern web development and UI/UX practices
- SJ Renovation Website — Company website for SJ Renovation, showcasing the business and the renovation services it provides
- Document Automation System — PDF quotation and Bill of Quantities (BOQ) generation and editing system built for SJ Sunrise Services and Sinar Jasa Trading, using PyMuPDF, pdfplumber, pikepdf, and ReportLab
- Morgana — Jarvis-style personal AI desktop assistant for Windows, built with Node.js/TypeScript and a Claude backend
- Personal Portfolio & GitHub — Maintains a personal developer portfolio (sukeshprofile.vercel.app) and an actively updated GitHub profile showcasing full-stack, mobile, and XR projects
